

RELEX & Legion

Unifying Retail Planning with Integrated Workforce Solution

Are you getting your customers what they want, when they want it—and spending as little money as possible accomplishing that? In today's connected digital world, maximizing productivity by reducing uncertainties is the top industry priority. With mounting pressures for faster turnaround times, tighter margins, and supply chain volatility, retailers struggle to increase agility and streamline back-end processes while gaining end-to-end visibility from suppliers to shoppers.

With RELEX and Legion together, retailers can unify and optimize supply chain planning with workforce planning to improve execution across Inventory, Space, and Labor, delivering an end-to-end forecasting, global planning, and optimization solution across stores and distribution centers with enhanced reporting and analytics.

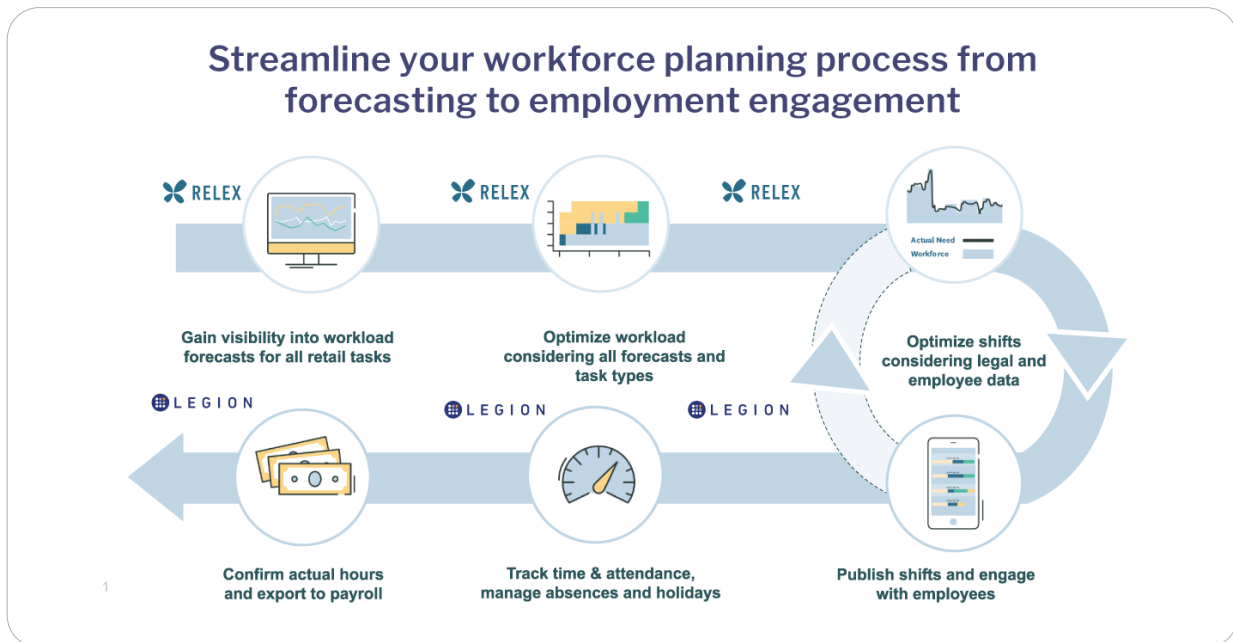

Key Capabilities

- Stocking activities can be up to 40% of the store's workload. Together, RELEX and Legion deliver more accurate forecasts to optimize schedules and maximize stocking productivity
- Integrated shipping and receiving workloads allows optimal scheduling for the correct number and length of shifts. RELEX provides Legion with actual delivery and volume of delivery to precisely schedule labor where it is most needed
- Extend RELEX Delivery Flow Smoothing capabilities to ensure that stores and supply chains operate harmoniously
- Both the stores and distribution centers can react in an efficient, compliant, and employee-centric manner to changes in schedules caused by changes in the supply chain
- Increase agility and simplify administration using one workforce management solution across stores and distribution centers

Key Benefits

- **DRIVE OPERATIONAL EFFICIENCIES** Legion and RELEX deliver a powerful, integrated software solution that improves demand forecasting and replenishment processes, providing retailers with more accurate planning of replenishment, cashier, and all types of retail work while simultaneously transforming in-store labor operations and the hourly employee experience.
- **PROVIDE OPTIMAL SCHEDULES** Automatically generate optimal shift schedules that meet employee and customer needs, matching employee preferences with skills 96% of the time.
- **INCREASE RETENTION** RELEX's customer stores and fulfillment/distribution centers benefit from Legion's proven capabilities to lower turnover while improving worker productivity.
- **SELL MORE** when employees with the right skills are in stores at the right time to replenish shelves and provide customer service, maximizing efficiencies across all channels with unified retail planning.
- **UNCOVER AND CUT HIDDEN COSTS** resulting from payroll errors, compliance issues, or lost productivity. The platform optimizes staff planning to meet business goals, allowing teams to quickly replace absent workers, reduce attrition, and streamline communication with frontline employees.

How it Works

The Legion and RELEX combined solution leverages data and cutting-edge technology to increase revenues, efficiencies, and control costs, while delivering an exceptional employee and customer experience. With Legion and RELEX, your store operations teams can simultaneously maximize labor efficiency and employee engagement.
